DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 9-11, 14 and 18-22 are rejected under 35 U.S.C. 102(b) as being anticipated by Pustanyk et al.

Pustanyk discloses (see fig. 3) an outer housing 78 having a cavity 76 therein and a through bore 98. The cavity is sized to receive a sonde. While the drawings disclose the cavity in the bearing housing, column 7, lines 5-10 state that the cavity may be in the motor housing. As to claims 10, 19, 21 and 22, a shock absorbing gel 75 may be placed in the cavity. This gel is considered a shock resistant holder. A cover plate 82 is attached to the housing over the cavity. As to claims 11 and 20, the electronic equipment placed in the cavity is considered a sonde. As to claim 18, the sub 26 is considered a coupler and col. 7, lines 5-10 state that the cavity may be placed in sub 26.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 3672

The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claim 12 is rejected under 35 U.S.C. 103(a) as being unpatentable over Pustanyk et al in view of Keyes.

Pustanyk is considered to disclose all of the claimed features except for the cover plate having slots. Keyes teaches slots 112 in the cover plate to provide transmission channels. It would have been considered obvious to provide slots in cover plate 82 of Pustanyk as taught by Keyes so that the transmitted data may more easily be transmitted and received as taught by Keyes.

Art Unit: 3672

Allowable Subject Matter

Claims 13,15 and 16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claim 17 is allowed.

Response to Arguments

Applicant's arguments with respect to claims 9-22 have been considered but are moot in view of the new ground(s) of rejection.
